April 30, 2018 - 2:45 PM Edwards Big Newport

L'architecte Textile

France, Germany - 2017 - 101 min

When a designer decides to create one final suit, the result is hundreds of hours and thousands of stitches worth of work. From conception to final product, none can say the creation of clothes is an easy task, but thousands of people around the world still take up this art daily. This documentary gives insight into the world of fabric and thread as a designer shares their creative process, along with the highs, lows, and backfires that occur within any industry. Penny Slinger - Out of the Shadows

UK - 2017 - 94 min

After the war, the UK experienced an explosion of contemporary art and new ideas that had never been seen before. New issues regarding personal freedoms were raised, including the outpouring of those who required sexual liberation. Artists attempted to capture these phenomena, but only one succeeded. Using herself and her internal struggles as inspiration for her work, she bent the reality of what was known and expressed with her art what few could say with words. **DIRECTOR:** Richard Kovitch **PRODUCER:** Richard Kovitch
