# WITH THE MOON UNDER OUR FEET

**With The Moon Under Our Feet** is an exhibition that brings together seven artists whose practices merge portraiture, imagined futurity and surrealism. They capture transformation through time and reclaim their bodies as creations of their own making.

This group exhibition is a collection of the mystical and symbolic experiences that consider the cultural, social and imaginative representation of female identity as a complex and multifaceted experience. Invoking a feminist renewal of time and connections and how we come to terms with this future.

Featuring works by **Lezley Saar, Penny Slinger, María Adela Díaz, Cindy Rehm, Regina Herod, Jaklin Romine and Sarah Reyes.**

Hansell Gallery soundscape is a collaboration between artists dama and Adele Bertei as part of their sound project titled **Fantomette.**
